

Anush Rithvic Murugasamy

+91 9487327918 — anushrithvic@gmail.com — linkedin/anushrithvic — Coimbatore, Tamil Nadu.

Education

Bachelor of Technology in Computer Science and Engineering

Amrita School of Computing, Amrita Vishwa Vidyapeetham

August 2023 - Present

Coimbatore , India

Shree Sarasswathi Vidhyaah Mandheer

An aggregate of 86% in Standard 12 and 84% in Standard 10

Schooling

Coimbatore , India

Work Experience

Appilication Development Intern

Sri Kumaran Mills | [GitHub](#) | [Certificate](#)

May 2025 – July 2025

Coimbatore, India

- Developed **Billify**, an invoice generation application that streamlined billing operations using **Python (Tkinter)**, integrated with **SQL** for reliable data storage, and **FPDF** for automated PDF invoice generation.
- Enhanced the overall billing workflow, delivering an **80% reduction in generation time** and a **65% improvement in accuracy** through optimized database interactions, and automated reporting.

Projects

Manage Wise

Software that Manages Tasks

[GitHub](#)

- Engineered a robust task management system with **project tracking**, **employee scheduling**, and **real-time analytics**, automating **75% of repetitive processes** and enhancing **task tracking accuracy by 50%**.
- Responsive front-end application using **Python - tkinter** , seamlessly integrating with an **SQL** - based back-end, optimizing data retrieval, and enhancing user experience and operational efficiency.

Smart Mirror

A Mirror that Blends Functionality with Innovation

[GitHub](#)

- Architected a state-of-the-art **intelligent mirror**, providing **real-time updates** for time, weather, news, personalized to-do lists, and music playback, while integrating **5+ APIs** and a **voice control system**.
- Utilized **Raspberry Pi** as the primary hardware platform, with **Python** for the user interface and Storage solutions are met with **SQL**

Classi Fly

A High-Performance Bird Classification Model

[GitHub](#)

- Deployed an advanced **machine learning model** capable of accurately classifying bird species, supporting over **199 distinct bird classes** utilizing the Kaggle dataset with real-world use-case integration.
- Optimized model performance by leveraging **TensorFlow** and **PyTorch** with pre-trained models, achieving a **40% reduction** in training time and higher accuracy.

Skills

Languages Python, SQL, C, C++, Java, HTML5, CSS3, Dart, Haskell

Problem Solving Data Structures and Algorithms, Logical Thinking

Tools & Technologies Git, GitHub, Docker, Linux, RaspberryPi, Visual Studio, PyCharm

Frameworks Tkinter, TensorFlow, PyTorch, Flutter, Django, Pygame, PyTest

Areas of Interest App Development, System Design, Competitive Programming

Achievements and Activities

- **Core Team Member of ACM Student Chapter '25-26** - Technical and Event Coordinator
- Innovated projects like Smart Mirror and Manage Wise to improve daily and **workplace efficiency**.
- Strong interest in **Raspberry Pi**, **APIs**, **Machine Learning**.
- Led a six-member team in **Smart India Hackathon** and participated in **Tech Fest 2022** organized by SSVM.
- Certified in **Python and Problem Solving** by HackerRank.
